Connecting to the Event Display

1. Make sure that the event display is turned on (You should be able to hear a fan running).
2. Connect to the *hawcDisplay* wireless hotspot with the hawc password. **You will be unable to access the internet while connected to hawcDisplay**
3. In a web browser, navigate to [http://10.10.10.1/run_script.php](http://10.10.10.1/run_script.php) and click/tap one of the options to start the display.
