

# HAWC/Nova

Blochwitz 8/29/19

# Time Averaged Flux

- Averaged the flux across all spectra
  - All of the NoCut averaged together, all of 3 TeV cutoff, etc.
- Plotted by cut off energy
- No Cutoff was given as 0
  - Likely a better place for it

Time Averaged Flux and Cutoff

# Count Excess

- I have also been working to generate the count excess that liff gives out.
- This is taking a bit more than I expected but shouldn't be too hard.
- I do have 1 plot ready for today
  - One is near completion
