

Hawc Meeting February 2nd 2018

Brendan Boyd

Comparing Cuts

- ▶ Finished comparing fbin/ebin cuts with john's and tomas' results
 - ▶ Have very similar results to john. Not as similar with tomas but that was expected
- ▶ Started getting cuts for angres bins
 - ▶ Had software problems (remember to update aerie every once in a while)
 - ▶ Confused about the binning

Conclusion

- ▶ As expected my results are closer to John's than they are to Tomas'
- ▶ Something we might have to be careful about is it looks like small changes in pinc/licompact cuts can result in larger changes in Qvalue.
