

July 31st MSU Hawc meeting

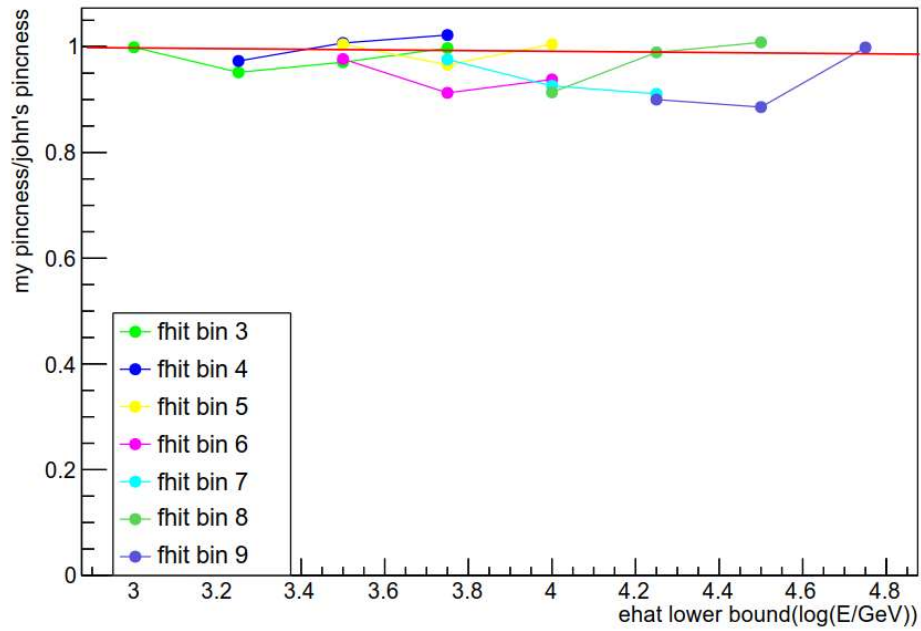

Brendan Boyd

Changes

- ▶ Was binning signal event using monte carlo log energy (`mc.logEnergy`)
- ▶ Now binning using reconstructed energy (`rec.logNNEnergy`)

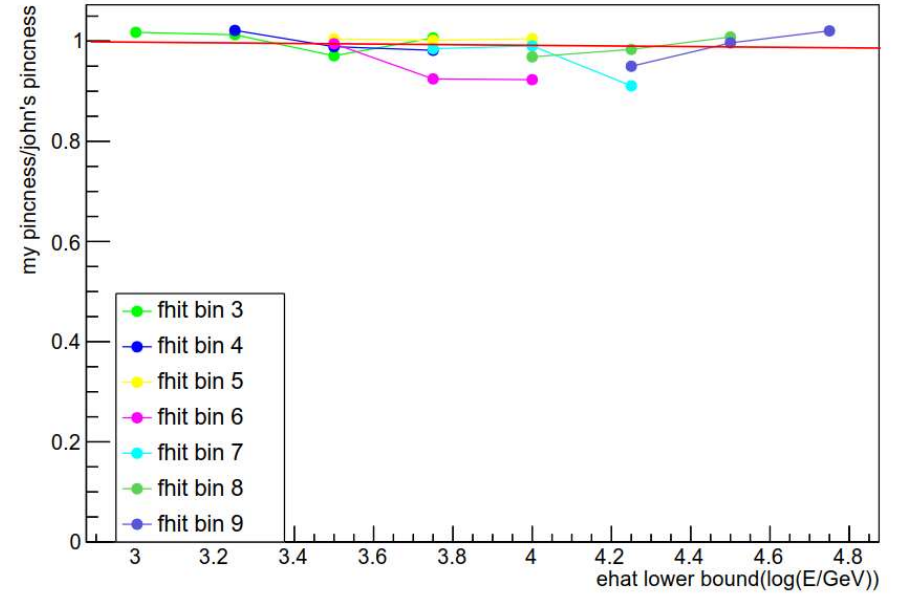

Binning with mc.logEnergy

ratio of pininess

Binning with rec.logNNEnergy

ratio of pininess

Next steps to get closer

- ▶ Optimizing an angular bin cut for each bin and applying that to the bin.
